

Note: Newcomers to software process improvement or the Capability Maturity Model IntegrationSM will benefit from these Web sites that offer information and training on all aspects of software process improvement.

Software Technology Support Center

www.stsc.hill.af.mil

The Software Technology Support Center (STSC) is an Air Force organization established to help other U.S. government organizations identify, evaluate, and adopt technologies to improve the quality of their software products, efficiency in producing them, and their ability to accurately predict the cost and schedule of their delivery. The STSC is offering a free workshop to U.S. government employees on Capability Maturity Model Integration Version 1.1 on May 21-23, 2002.

Software Technology Conference

www.stc-online.org

The Software Technology Conference (STC) is the Department of Defense's premier software conference. One tutorial and one track will be specifically aimed at addressing the Capability Maturity Model Integration Version 1.1. The CMMI tutorial can be found on Monday, April 29, 2002 Track 4 at 1:00 p.m.; the CMMI track can be found on Wednesday, May 1, 2002 Track 4 at 1:00 p.m.

Software Engineering Institute

www.sei.cmu.edu

The Software Engineering Institute (SEI) is a federally funded research and development center sponsored by the Department of Defense to provide leadership in advancing the state of the practice of software engineering to improve the quality of systems that depend on software. SEI helps organizations and individuals to improve their software engineering management practices. The site features complete information on models it is currently involved in developing, expanding, or maintaining, including the Capability Maturity Model Integration, Capability Maturity Model for Software, Software Acquisition Capability Maturity Model, Systems Engineering Capability Maturity Model, and more.

Software Productivity Consortium

www.software.org

The Software Productivity Consortium (SPC) is a nonprofit partnership of industry, government, and academia. The SPC develops processes, methods, tools, and supporting services to help members and affiliates build high-quality, component-based systems, and continuously advance their systems and software engineering maturity pursuant to the guidelines of all of the major process and quality frameworks. Membership is open to all U.S. or Canadian-based companies, government agencies, and academic organizations.
